

ALC Game Rules – Additional Information (Super Jackpot Wild Gems)

ENGLISH SLOTS

Game Help and Paytable are available within game.

ADDITIONAL INFORMATION

SPECIAL SYMBOLS

Diamond, Ruby, and Amethyst symbols are wild and substitute for Seven and Bar symbols that also land on the payline. Diamond, Ruby, and Amethyst symbols do not substitute for Multipliers. Only highest winner paid per line.

SUPER JACKPOT PROGRESSIVE

When 3 Wild Gems land on an active payline, the associated Progressive tier is awarded. See Progressive payable for prize values. Top Progressive is available only at max lines bet.

MULTIPLIER SYMBOLS

Certain Bar and Seven symbols display a 2X, 3X, 4X, or 5X multiplier. Multipliers multiply winning combinations except progressives. Two or more multipliers on a payline multiply the winning combination. The maximum total multiplier for a winning combination is 40X. 2X multipliers are available on 7 and Double Bar symbols. 3X multipliers are available on Single Bar and 77 symbols. 4X multipliers are available on Double Bar Symbols. 5X multipliers are available on 777 and Single Bar symbols.

Progressive tiers are funded by a percentage of all wagers.

Interrupted Game

In the event of disconnection, an interrupted bonus feature may be resumed immediately by starting the game again. The results of a completed reel spin (where display of the visual result was interrupted) will not be re-displayed within the game but may be reviewed in My Transaction History.

Any amount wagered on an unfinished spin will remain paused until you either complete the game, the game is voided, or it's auto completed within 24 to 48 hours. When an unfinished spin is voided, your bet will be refunded to your account.

Game History

The result of a completed game may be viewed in My Transaction History immediately after closing the game window. Results of unfinished games are not displayed in My Transaction History.

Expected Payback

The theoretical average return to player (RTP) is 95.58 – 95.95%. This RTP represents the long-term expected payback of the game which has been calculated by an independent testing lab. Bet settings

determine the RTP percentage range; adjusting the bet settings to the maximum number of lines, bet levels, or bet multipliers provides the maximum RTP.
